

CyberRegs

AN ONLINE REGULATORY COMPLIANCE LIBRARY TO MEET THE DEMANDS OF ENVIRONMENT, HEALTH & SAFETY

BENEFITS

- Reduces EHS specialists' time spent researching regulatory information
- Increases efficiency in analyzing impacts of regulatory changes on operations
- Provides visibility into pending regulatory changes
- Enables the creation and management of an electronic compliance register

CyberRegs® is a continuously updated online library of regulatory documents spanning environmental, health, safety and transportation topics. The scope of regulatory coverage includes the United States, Canada and Mexico (including States and Provinces) for a wide range of content and topics including: Air, Water, Waste, Occupational Health, Safety, Community, Transportation, Chemical Management and more.

With constant changes to regulations published in different formats and update cycles, ensuring your organization is in full regulatory compliance can be a challenge. Sphera has specialized monitoring tools, processes, and experts to keep abreast of regulatory changes. Sphera adapts to evolving government publishing approaches to ensure that content provided in CyberRegs matches the primary source. In many cases changes are made to the content the same day changes are published by relevant agencies.

CyberRegs eases the search burden for expert users by combining a large number of regulatory references in a single comprehensive source and maintaining the hierarchical structure to mirror the primary source (e.g. Title, Part, Section and Paragraph). In addition, the original text is converted to hypertext and reference links are created between documents so users can efficiently surf the regulatory content to quickly find the pertinent information and applicability for their operations.

Empower your workforce to efficiently identify, track, and manage compliance obligations impacting your business

With CyberRegs you can:

Efficiently search and find applicable laws and obligations

- Extensive search capabilities allow users to mine data using natural language or keywords and refine results according to specific domains, publications or countries.

Effectively collaborate with colleagues

- Users can share annotations or direct links to any document, section or paragraph with other CyberRegs users in the organization, alerting them to changes that may affect their area of compliance.

EXTENSIVE REGULATORY CONTENT COVERAGE

- Entire Code of Federal Regulations (CFR)
- Entire U.S. Code (Statutes & Preambles)
- U.S. Federal Register (FR)
- Proposed regulations
- Entire State-level EHS Transportation laws & regulations
- Canada Gazette
- Canadian Acts of Parliament
- Mexican Federal Laws, Regulations & Standards

Quickly assess impacts of regulatory changes to your business

- Users can customize preferences for the Early Warning System so that they receive an e-mail notification when regulations of interest have changed.
- Users can immediately identify revisions by virtue of the color-coded Change Tracking System. Archived versions of each document are retained by CyberRegs for reference and comparison between two versions.
- Bookmark and annotation capabilities let users keep track of specific paragraphs for ease of reference.

Simplify processes by creating an enterprise compliance platform

- Analyzes, benchmarks and rolls-up environmental performance indicators for monitoring and managing of site level, intermediate or overall corporate goals.

Powerful Functionality Designed to Streamline Compliance Work Processes

Change Tracking System

Use of color-coded highlights allow for fast detection of changes between current and archived documents.

Early Warning Service

Email alerts that will notify users of updates and proposed changes based on preferences.

Community Email

Quickly collaborate by sharing documents and comments with other users.

RegMatch

Cross-reference regulatory documents—federal to state, state to federal and state to state.

Reverse Links

View a master list of any and all hyperlinks within a document for quicker access.

Annotations

Add company-specific information and commentaries to documents and share throughout the organization.

Stored Notification System

Create, manage change, and collaborate regarding regulatory applicability to operations

Connect

Integrate and link industry standards directly to operational processes from the regulations to meet compliance demands (e.g. API, ANSI, ASTM, ASME, ISO & NFPA).
