Supporting Product Sustainability

Deliver more sustainable products, reduce costs and enhance your brand: LCA Calculator enables you to quickly understand and communicate the sustainability performance of your products and compare alternative product designs, without the need to be an LCA expert!

Enabling LCA for Everybody

Easily integrate Life Cycle Assessment (LCA), Environmental Product Declaration (EPD) or any kind of environmental footprinting into your internal processes, quickly evaluate 'what-if' scenarios and communicate effectively using standardizable reports.

How LCA Calculator Works

Once an LCA is modelled in the LCA software, simply import the file into LCA Calculator. In this intuitive web application you can easily use and change parameters of your models and thus compare different scenarios of your product design. Then simply with the push of a button create and export your LCA report in your corporate design as a PDF or RTF file!

LCA Calculator Enables You to

• Calculate LCAs and EPDs • Generate carbon & water footprinting • Create 'what-if' scenarios • Compare alternative product designs

Boost Your Productivity

You can connect to or even integrate LCA Calculator via API into your existing IT infrastructure (e.g., CAD, PLM or ERP) to automate the creation of LCAs and EPDs. This saves time and increases the profitibility of your environmental efforts!

Fast, Standardized Reporting

Easily communicate the sustainability performance of products to coworkers with pre-defined, configurable templates, including official reporting schemes like Environmental Product Declarations (EPDs) from wherever you are in the world.

ACCELERATE DECISION MAKING AND REDUCE TIME TO MARKET

GET FAST LCA RESULTS EVEN AS A NON-LCA EXPERT

EASILY COMPARE DESIGN ALTERNATIVES

INCREASE YOUR EFFICIENCY USING LCA CALCULATOR API

CREATE AUTOMATED REPORTS WITH ONLY ONE CLICK
