Compliance Engine for EH&S

Accelerate Your SAP Journey & Optimize Your EH&S Investment

A modular pre-packaged SAP® EH&S product compliance suite that delivers regulatory data, rule sets, phrases, templates, and configuration tools to accelerate the benefits of your investment.

Sphera helps you increase consistency, improve execution, and reduce risks -- positioning you for growth. We do so by providing all the components necessary for creating compliant documents:

- Extensive integrated global regulatory content
- Rules for automating SDS authoring
- A specialized content editor to tailor the authoring system to company requirements

Compliance

The Sphera Compliance Engine for EH&S is a comprehensive managed regulatory content solution designed for the process industry to accelerated deployment. It injects a broad range of pre-packaged content and analytics into the SAP® EH&S Module and reduces deployment time and effort. Because there is more than one way to stay compliant, or interpret regulatory grey areas, Compliance Engine provides extensive flexibility in parameter controls. Users can enforce decisions about regulatory variables affecting the content of their Safety Data Sheets.

Flexibiity

Sphera Enhance is a state-of-the-art content editor that regulatory experts can use to change the behavior of their core SAP® EH&S system rules and support company specific requirements. It allows the creation and/or adoption of the most current regulatory content in Compliance Engine for EH&S application. Via a user-friendly interface, Enhance enables the creation and/or modification of rules, viewing of phrases and mapping of rule outputs to a product property tree.

Control Your Data

Sphera Compliance Engine for EH&S has robust capabilities enabling you to control your data by:

- Letting you decide which regulatory content gets loaded to your SAP environment, protecting your IP
- Control your data by enabling a review of regulatory assessments prior to committing data to the substance database
- Control assessment output by adding company, industry and/or product line rules and/or adaptations
- Deliver improved usability to experts requiring no technical expertise
- Provide access to views and modifications of your systems' behavior without customization of your system

Engage a Community of Experts

- Regulatory Focus Groups: Collaborate with regulatory experts on current and upcoming regulatory topics and what that means to Sphera's content and rules

- Sphera Customer Network: Access a vast library of tutorials, documentation, downloads, as well as enhancement requests

- Sphera Community Forums: Engage the user community with our Forums capability

- Unlimited 24/7/365 Customer Care: We aim to "Delight" our customers in everything we do!

Best-in-class Regulatory Content

DataLink for EH&S - Product Safety is an up-to-date collection of physical, chemical, toxicological, ecotoxicological and regulatory data. This data is systematically updated and is an essential integrated input element that supports the rules engine. DataLink for EH&S - Dangerous Goods provides the data you need for UN Listed Substances and reduces the time and costs associated with entering and maintaining dangerous goods data. It ensures compliance with transport legislation and covers the following transport regulations: DOT, TDG, ADR, ADNR, RID, ADG, China, Mexico, Brazil, New-Zealand, IATA, IMDG, and UN.
