

# Chemical Management

Administer, track and manage your materials.

Comprehensive chemical management is critical to the safety of your employees and compliant operations. The more chemicals and hazardous substances you have, the higher the risks associated with using and storing them. The more countries you ship them to, the higher the complexity to manage regulations effectively from receipt, to use, to disposal.

Balancing safety and compliance objectives with resource and cost constraints requires expert knowledge of the world's complex and ever-evolving regulatory landscape – especially for chemicals. Sphera provides smart and reliable Chemical Management solutions that help you efficiently control safety and compliance.

Access to SDS  
documents and data

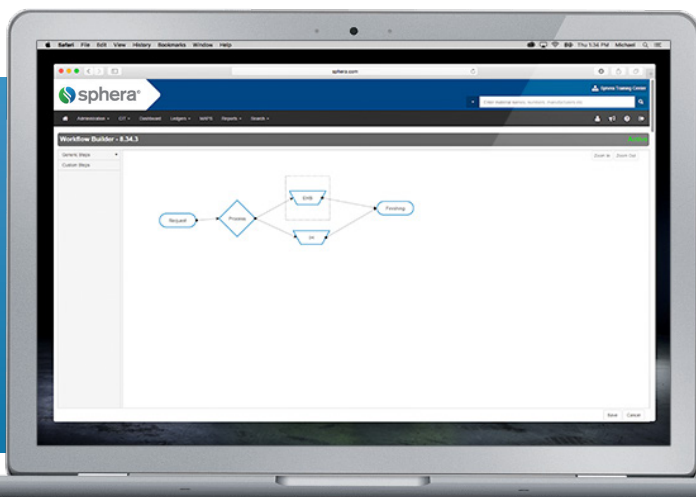

Control what  
comes on-site

Report on  
chemical data

Comply with  
standards and regulations

## Designed with your chemical data lifecycle in mind

Sphera's comprehensive Chemical Management solutions enable you to centralize and manage the chemicals you have on-site and help you comply with global regulations

# Improve compliance, safety and your bottom line.

From access, administration and maintenance of SDS, to label printing, to material approval processes, Sphera's Chemical Management solutions help effectively manage chemicals on-site.

Understand your data to maintain compliance, reduce risk and improve the bottom line. Sphera provides a SaaS solution with high-level tracking and reporting functionalities that enable administrators to manage global chemical data within a single system. The result is consistent, contextualized and centralized data that is immediately accessible to anyone in your organization.

## Manage Your SDS and Chemical Data

Pre-built, out-of-the box and configurable templates provide your team with the tools it needs to uncover hidden risks and security gaps in a consistent, standard format.

## Track your substances

Centralized access to process, quality, security and occupational knowledge libraries and lessons learned enables teams to collaborate and determine traceability, ensure compliance and control reliability.

## Meet Regulations and Compliance

A unified approach to risk and quality management activities with an audit trail ensures better compliance with governing regulations and risk legislation.

## Administer your Approvals

Advanced visualization tools provide enterprisewide access to a joined-up view of the risk profile, consistent metrics to monitor the effectiveness of controls and common reporting on performance.

# Increase efficiency and reduce risk.

- Centralize your management of chemicals, chemical data and SDSs
- Save time and money with automated management, tracking and reporting
- Minimize risk of penalties with expert knowledge and regulation monitoring
- Achieve total control of chemicals coming on site
- Comply with standards and regulations

## The best value in Product Stewardship.

Our Chemical Management tool, available on the SpheraCloud™ platform is:

### Cost-effective

Sphera's platform-approach to risk management reduces costs and improves your journey to Integrated Risk Management.

### ROI-focused

Achieve fast digital return on your investment with standardized templates and configurable workflows that will have you up and running quickly.

### Globally Supported

Designed from the ground up for enterprisewide implementations on a global scale, receive superior care during and after your implementation.

Want to reduce costs and risks managing your chemicals?
