

LCA Data: Materials Based on 100% Purchased Renewable Electricity

We know that reaching Net Zero and achieving Carbon Neutrality are top of mind for many companies. This Product Sustainability (GaBi) LCA database will help you understand how changing your electric supply to all renewable sources can help you reach those goals.

Model the impact on your life cycle wide emissions if all upstream products switched to renewable electricity

Understand how switching from the electricity grid mix to renewable electricity will effect your emissions profile

Empower your team to make fact-based decisions
