sphera®

SIMPLIFY YOUR SUSTAINABILITY REPORTING EFFORT WITH
SPHERACLOUD CORPORATE SUSTAINABILITY
FOUNDATIONS

SpheraCloud Corporate Sustainability software is for organizations that require a solution to support their Environment, Social and Governance (ESG) reporting. Whether you are looking for a solution to support your GHG reporting data collection based on GHG Protocol, or a solution for all your ESG reporting as defined by GRI, CDP, TCFD, SECR, and CSRD, we offer the most comprehensive and robust software available in the market today. **Corporate Sustainability** Foundations is pre-configured and thus easy to understand and implement. And because you can train your workforce and start data collection within weeks, you'll be prepared for mandatory corporate sustainability reporting long before regulations go into effect.

FOUNDATIONS HIGHLIGHTS

- Best-in-class reporting and data collection platform allowing organizations to shift from Excel-based processes to a centralized, cloud-based scalable solution

- Ability to capture relevant data relating to Environment, Social and Governance as defined by GRI, CDP, TCFD, SECR, and CSRD, and report the data in alignment with these frameworks and reporting requirements

- Out-of-the-box configuration can be set up within weeks, with pre-configured data points for ESG categories, questionnaires, reports and dashboards, and online help

- Standard Emissions Factor libraries based on different sources (Defra, GHG Protocol, Product Sustainability (GaBi), IEA, EPA, etc.) available and already linked to activity data

- Projects kick off & planning, configuration workbook sessions including review and trainings

METRO GROUP

"Corporate Sustainability software is a great tool to efficiently collect, store and report information about progress in terms of sustainability."

- Michael Goebbels, Metro AG

ista

"We now automatically document the sustainability efforts, so we can record and analyze our progress even better. This saves us a lot of time, which we can instead invest in achieving our sustainability targets."

- Dr. Simon Weihofen, ista

AVAILABLE EXTENSION MODULES FOR SPHERA'S CORPORATE SUSTAINABILITY FOUNDATIONS

SpheraCloud Foundations can be extended with several modules to meet your growing needs and improve your sustainability performance.
Compliance & Control
Supports data validation routines by automatically identifying data anomalies and out-of-range data

Targets & Actions
Helps you manage targets and improvement measures to achieve tangible business benefits such as reduced energy costs and improved performance

eXchange
Connects other corporate data sources directly to your SpheraCloud Corporate Sustainability solution

Publishing
Allows application administrators to create publishable results and send preformatted reports to user groups at regular intervals
