

A ROBUST DATA FOUNDATION IS NEEDED TO MOVE TOWARDS NET ZERO

DATA QUALITY MATTERS FOR BETTER DECISION-MAKING

DATA QUALITY IS ESSENTIAL for carbon accounting, reliable quantification of your company's emission baseline, identifying hotspots, evaluating reduction pathways, and measuring progress towards a **NET-ZERO TARGET**.

Using high-level and low-quality emissions data could lead to inaccurate results and wrong decisions, higher offsetting costs and potential fines from regulatory bodies, **BREACHING THE TRUST OF CONSUMERS AND RAISING ACCUSATIONS OF GREENWASHING.**

TO AVOID THESE RISKS, HIGH-QUALITY INDUSTRY-BASED DATA THAT IS REGULARLY UPDATED IS MANDATORY.

HAVING A TRUSTED DATA PARTNER & HIGH-QUALITY DATA available for your team is key for making strong business decisions when it comes to quantifying and improving your corporate and product carbon footprints.

Talk to an expert about how high-quality industry-based emissions data can save you time and money.
