As we navigate through our annual planning, staying abreast of regulatory changes remains a top priority. While our list is not exhaustive, it encompasses regulations and themes that pique our interest for various reasons. Here's what we're keeping an eye on:

#### **PFAS REGULATIONS:**

- Continuously evolving global changes require vigilance.
- Different definitions of PFAS create challenges as various jurisdictions establish their own criteria.
- Continuous monitoring and updates will help organizations maintain compliance.

### **INDIA'S REGULATORY LANDSCAPE:**

- Developments include the implementation of GHS and chemical registration regulations.
- Despite ongoing revisions, the Indian Chemical Management and Safety Rules hold significance due to India's substantial market presence.

## • Ongoing maintenance requi

### **EUROPEAN UNION'S POISON CENTRE NOTIFICATIONS:**

- Ongoing maintenance requirements call for continued attention.
- Updates to IUCLID and PCN formats require diligent software and system management to avoid disruptions.
- CLP updates may impact submissions, underscoring the importance of synchronized data management.

This year, regulatory landscapes promise new challenges and opportunities. Our team of experts will work closely with you, offer focus groups and provide enhanced information to harness our solutions for continued success. Stay tuned for detailed blogs on these topics throughout the year. As always, our team of regulatory industry experts stands ready to assist you at every step of the regulatory journey.

# Are you prepared for these regulatory updates?
