

Level up your risk management

Upgrade Desktop Pro to Advanced Risk Assessment and unlock new levels of insight and control.

Sphera's Advanced Risk Assessment (ARA) cloud solution significantly enhances risk management by transitioning from a solo, file-based process to an integrated, organization-wide system. While Desktop Pro remains a favorite for individual assessments, our modern, collaborative and scalable ARA solution meets the increasing demand for comprehensive tools that support the entire organization.

Transform individual risk assessments into a collaborative, scalable approach that meets your evolving needs.

Why transition to cloud-based Advanced Risk Assessment?

Switching to our cloud-based Advanced Risk Assessment Software brings significant advantages to your organization.

Collaboration: ARA enables real-time collaboration and centralized data storage, allowing teams to work together seamlessly and stay on top of any changes or updates. This eliminates the need for multiple versions of documents and provides a single source of truth for all users.

Scalability: As your organization grows, so does the complexity of risk management. ARA offers a scalable solution that can adapt to your changing needs without compromising performance or functionality.

Accessibility: As ARA is cloud-based, you can access it wherever you have an internet connection. This increases flexibility and efficiency, especially for remote teams.

Automation: ARA streamlines the risk assessment process with automated workflows and notifications. This reduces manual tasks, increases accuracy and saves time.

Desktop Pro vs. Advanced Risk Assessment

Industry-leading features	Desktop standalone	ARA
Implementation	Desktop	Cloud-based
Configurable risk assessment templates	✓	✓
Knowledge management sharing (Copy from/AutoType)	✓	✓
Structured 1-to-many worksheet rows	✓	✓
Risk assessment analysis charts and graphs	✓	✓
Risk assessment linkage	✓	✓
Traceability linkages (Data mirroring)	✓	✓
Internationalized	✓	✓
Ability to migrate risk assessments to latest template revision	✓	✓
Web-based accessibility		Chrome, Edge
Dashboards across divisions and studies with accumulated data		✓
Offline risk assessment support (Offline client)		✓
Centralized secure repository for risk data and processes		✓
Role-based security		✓
Life cycle management		✓
Revision/version chain and audit history	✓	✓
Task and action tracking		✓
Configurable RA recommendation and review/approval workflows		✓
Configurable business processes/workflows capabilities		✓
Global search		✓
Cross-study reporting		✓
Bowtie analysis		✓
Integration APIs		Library API

Exciting new enhancements to our ARA Software!

- Standardize and centralize best-practice risk assessment templates (PHA, HAZOP, LOPA, JSA, SVA, FMEA).
- Integrate external systems and data with ARA's Create/Update Library API capability.
- Manage users and roles seamlessly, either centrally or through your Identity Management (IdM) system.
- Enhance user input with our expanded Browser-based Editor capabilities, including Find & Replace.

Using ARA's cloud capabilities, you maintain comprehensive risk analysis with support for methodologies such as FMEA and HAZOP; apply configurable templates for tailored studies; access library functionality for streamlined completion; and enjoy a user-friendly experience, as with Desktop Pro.

Schedule your personal demo today and unlock efficiency and enterprise-wide risk management with Sphera's cloud-based Advanced Risk Assessment Software!
