

COMPLIANCE ENGINE FOR EH&S: Powered by Content

Compliance Engine for EH&S is an integrated pre-packaged product compliance suite for SAP EH&S that delivers trusted regulatory data, rule sets, phrases, templates and content to accelerate the benefits of your investment.

The two most important factors when it comes to managed regulatory compliance content are **CONTROL** and **RELIABILITY**.

CONTROL OF CONTENT

Having the ability to review data before it is committed to the system reduces risks and the possibility of errors. You are in control when it comes to what goes into your system, increasing the visibility and traceability of the data associated with your products.

RELIABILITY

Sphera's experts monitor and analyze regulatory changes and deliver rules and logic to automate the classification and assessment of products according to regulatory jurisdiction.

300,000+

Chemicals & Properties

7,500+

Proprietary Rules

15,000+

Regulatory Phrases

65+

Content experts on staff

Sphera's industry-leading regulatory content, technology and expertise can guide your organization through any of the upcoming regulatory changes. **Ready to learn more? Contact us.**
