ABOUT Sphera Solutions
Sphera creates a safer, more sustainable and productive world. We are a leading global provider of Environmental, Social and Governance (ESG) performance and risk management software, data and consulting services with a focus on Environment, Health, Safety & Sustainability (EHS&S), Operational Risk Management and Product Stewardship.

Benefits of Refrigerant Compliance Management Software

Refrigerant Compliance Management Software will help you document, organize, and create reports of your refrigerant activities to effectively comply with the Refrigerant Recordkeeping Requirements.

- Record all appliance information including a complete history of service details, refrigerant consumption and CO_2 equivalent in metric tonnes.
- Automatic alerts for leak inspections to ensure prompt attention to critical regulatory issues.
- Conveniently schedule repair verification tests and leak inspections for appliances.
- Auto-populated reports for appliances, service records, disposals, and potential compliance issues for management's attention.
- Track Automatic Leak Detection systems and portable leak detector details including calibration history and appliance assignment.
- Maintain complete technician certification and training records.
- Track refrigerant inventories - from purchase to usage to disposal.
- Global Refrigerant Management: US EPA, EU F-Gas, or other jurisdictions.

Compliance Messenger add-on option for Refrigerant Compliance Management Software

Automatic and escalating email alerts to a technician, manager, or contractor ensure critical compliance issues are not missed.

- Leak repairs have not been completed

- A service record or follow-up leak test is scheduled

- A refrigerant cylinder or recovery unit is due for inspection
