

# SIMPLIFY YOUR SUSTAINABILITY REPORTING EFFORT WITH SPHERACLOUD CORPORATE SUSTAINABILITY FOUNDATIONS

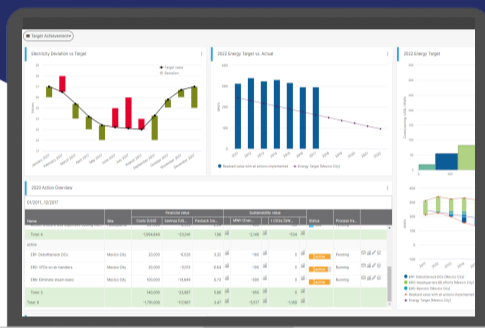

SpheraCloud Corporate Sustainability software is for organizations that require a solution to support their environmental, social and governance (ESG) reporting. Whether you are looking for a solution to support your GHG reporting data collection based on GHG Protocol or a solution for your ESG reporting as defined by GRI, TCFD and SECR, we offer the most comprehensive and robust software available in the market today. **Corporate Sustainability Foundations** is pre-configured, so it's easy to understand and implement. You can train your workforce and start data collection within weeks.

## FOUNDATIONS HIGHLIGHTS

- A best-in-class reporting and data collection platform that allows organizations to shift from Excel-based processes to a centralized, cloud-based, scalable solution.
- The ability to capture and report relevant ESG data in alignment with reporting frameworks and requirements such as the GRI, TCFD and SECR.
- Out-of-the-box configuration can be set up within weeks with pre-configured data points for ESG categories, questionnaires, reports and dashboards, as well as online help.
- Standard emission factor libraries based on sources such as Defra, GHG Protocol, Product Sustainability (GaBi), IEA and EPA are available and already linked to activity data.
- Includes project kick-off and planning and configuration workbook sessions, including review and trainings.

**METRO**  
 “Corporate Sustainability software is a great tool to efficiently collect, store and report information about progress in terms of sustainability.”

- Michael Goebbels, Metro AG

**ista**

“We now automatically document the sustainability efforts, so we can record and analyze our progress even better. This saves us a lot of time, which we can instead invest in achieving our sustainability targets.”

- Dr. Simon Weihofen, ista

## AVAILABLE EXTENSION MODULES FOR SPHERA'S CORPORATE SUSTAINABILITY FOUNDATIONS

SpheraCloud Foundations can be extended with several modules to meet your growing needs and improve your sustainability performance.

### Compliance & Control

Supports data validation routines by automatically identifying data anomalies and out-of-range data.

### Targets & Actions

Helps you manage targets and improvement measures to achieve tangible business benefits such as reduced energy costs and improved performance.

### eXchange

Connects other corporate data sources directly to your SpheraCloud Corporate Sustainability solution.

### Publishing

Allows application administrators to create publishable results and send preformatted reports to user groups at regular intervals.
