

Sphera SCRM Risk Monitoring Package [formerly riskmethods]

Crisis response continues to dominate the work of procurement and supply chain professionals. Supply chains remain fragile from the compounded effects of the coronavirus pandemic, extreme weather, logistics bottlenecks, shortages, and the Russian-Ukraine war. Sphera SCRM Risk Monitoring Package is designed to help small and midsize companies withstand disruptions and remain compliant, empowering them to build supply chain stability and resilience.

What does Sphera SCRM Risk Monitoring Package contain?

Sphera SCRM Risk Monitoring Package [formerly riskmethods] includes **Sphera SCRM Platform** capabilities, **Sphera SCRM Risk Radar** real-time monitoring for 250 third-party sites, and **Sphera SCRM Security Package** to simplify implementation while maintaining IT-security.

Sphera SCRM Platform is modularized and integrated to support end-to-end supply chain risk management processes. It delivers key elements for driving artificial intelligence:

- ▶ Data and data integration
- ▶ User interface
- ▶ Workflow and dashboard capabilities
- ▶ Reporting features

Sphera SCRM Risk Radar enables you to map your entire supply network on a digital world map. Artificial intelligence monitors millions of media stories in real time, while respected data sources such as Munich RE NATHAN Risk Suite, Transparency International, and Standard and Poor's round out your risk data. You receive early warning signals about all kinds of potential risk so you can take proactive measures. Risk scorecards provide comprehensive risk profiles for better decision-making.

Sphera SCRM Security Package includes **Sphera SCRM Single-Sign-on** and **Sphera SCRM MyDomain Email** to safeguard the IT-security of users:

- ▶ **Sphera SCRM Single Sign-on** allows you to access Sphera Supply Chain Risk Management with your existing corporate credentials. This saves administrative resources, maintains IT-security, ensures compliance, and boosts adoption, to enable you to manage risks more proactively.
- ▶ **Sphera SCRM MyDomain Email** is a mail server add-on that allows you to increase your IT-security. Emails are sent over your mail server via simple mail transfer protocol (SMTP). You comply with IT-security guidelines and business partners can identify our mails as trusted emails.

What is special about Sphera SCRM Risk Monitoring Package?

- **Get covered for all kinds of risk.** Supply chain risk management is about the whole spectrum of risk. Sphera SCRM data sources assess financial risk, natural hazard risk, reputational risk, geopolitical risk, man-made risk, and cyber risk.
- **Strengthen your supply network health.** From sub-tiers all the way to your customers, check the health of your supply network via an interactive world map. Reveal supply chain dependencies and risky situations and take actions to prevent risk from costing you.
- **Drive better decisions.** Artificial intelligence monitors your supply chain risk in real time, so you can accurately understand your risk exposure. Stay ahead of the competition. In risk management, every second counts. Be the first to respond to threats before they become critical.
- **Save time.** Instantly understand the impact of risk events through connections between affected suppliers, locations, ports, or other risk objects. View risk profiles on automatically populated risk scorecards. Quickly produce reports on your supply network health.

Closed Loop Supply Chain Risk Management

Sphera SCRM Risk Monitoring Package contains modules and capabilities from Sphera Supply Chain Risk Management [formerly riskmethods]

Sphera Supply Chain Risk Management [formerly riskmethods] empowers you to cover the entire supply chain risk management lifecycle by monitoring, identifying, assessing, and mitigating supply chain risk. Artificial intelligence helps you to automate and accelerate threat detection to gain competitive advantage with a well-managed approach to meeting customer demands, protecting reputation, and reducing total cost of risk.

We use Sphera Supply Chain Risk Management [formerly riskmethods] for the full cycle of supply chain risk management: to identify risk in the first place, to understand the impact of that risk and then to take action to mitigate it.
